

Web-Based Bullion Trading Platform for Investment Advisors

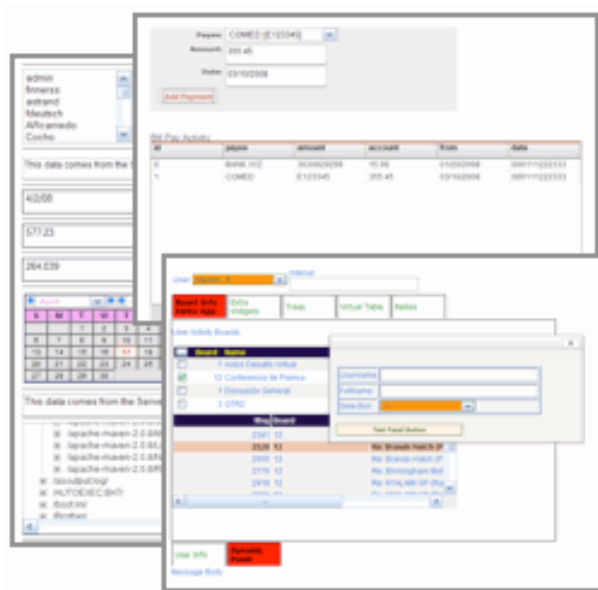

Anthem Vault Professional makes it easy for Investment Advisors to purchase physical precious metals, adding bullion to client portfolios by using a protected web-based trading portal. Our unique protocol combines a secured web front-end, simple-to-use client reporting APIs and best practices in software development.

Product Highlights

Anthem Vault Professional enables Investment Advisors to develop rich web-based interfaces for any type of software application. Swan-engineered software delivers high productivity, code maintainability and ease-of-use so that developers can concentrate on their core competencies and not be distracted by AJAX issues like browser incompatibility and JavaScript maintenance and debugging.

Ease of Use

- No need to learn new tag libraries
- No need to learn JavaScript to leverage AJAX features
- Start coding your AJAX-based pages at once, using HTML only
- Use Swan with any of our supported server-side scripting and programming languages
- Transparent integration with server-side components
- Easily push changes to the browser from your server-side components

Feature Highlights

- Proven enterprise framework
- Browser based: no plug-in required
- Cross-browser AJAX client runtime
- AJAX widgets & functions w/ source
- 3rd party widget integration
- JavaScript Support
- Sample applications
